

VILLAGE OF CLAYTON

PUBLIC NOTICE

A portion of Riverside Drive and Webb Street in the Village of Clayton will be temporarily converted to one-way traffic to accommodate work at the Village wastewater pump station located on Riverside Drive.

No part of the newly completed roadway or sidewalks will be excavated or damaged as part of this work. The partial road closure is needed due to limited available work space at the site and temporary operational measures that are needed at the pump station to complete the work. Proper signage, cones, and protective equipment will be placed to instruct motorists and pedestrians on the proper detours throughout construction.

The one-way traffic pattern will be in effect starting May 3rd and is expected to continue until June 16th.

The Village of Clayton appreciates the understanding of local businesses, residents and tourists during this time as we complete this essential infrastructure project.
